Those members of the Salt Lake bar who have expressed themselves that the shyster Blandin was rather severely dealt with—and these opinions have been heard since Judge McBride took up the cudgels in the shyster's defense, are probably not aware of all the de-lightful spots in Mr. Blandin's past career. There is one little bit of ro-mance which stands out so prominently in his memorable history that we can

JUDGE ZANE'S DECISION.

Monopoly. As our court records show, Judge

Zane yesterday delivered the following

As our court records show, Judge Zane yesterday delivered the following opinion:

In case No. 19, the defendant has interposed a demurrer to the complaimants, Dooly and Barnett, to foreclose certain deeds of trust, and the complaimants have interposed a demurrer to the answer of saith, and to his cross complaint, and also the intervening petition of Hardy and other stockholders.

Without taking time to state the allegations of the complaint and intervening petitions, I am of the opinion that allegations of the original complaint are sufficient, if proven, to warrant the Court in giving plaintiffs the relief asked, and the allegations of the answer and cross-complaint, show a defense and answer to this complaint. With respect to the intervening petition it appears from the allegations of the bonds which these trust deeds are given to secure; if the allegations are true, the Union Pacific Railroad company owns a large portion of the bonds which these trust deeds are given to secure; if the allegations are true, the Union Pacific railroad company is controlling the Utab Eastern railroad company, the directors and officers of that company, and so controlling them that they make no defense to this action under such ciecumstances, and under the charges of fraud and collusion made, I am of the opinion that the stockholders should be permitted to defend. I am disposed to hold that all these parties should be permitted to flitigate their rights, and the Court should ascertain what the rights of the respective parties are, which cannot be done without some investigation—and, in the meantime, a receiver should be appointed. All of the parties ask that a receiver be appointed—all concur in that. The receiver should be appointed, and in the interests of all the parties as they alm appear upon the linal hearing.

I am of the opinion, therefore, that a receiver should be appointed in the interest of all the parties as they alm appear upon the linal hearing.

I am of the opinion therefore, that a receiver should be appointed i

CATTLE NEWS.

The Coming Monster Convention in This City.

Cattle men generally feel encouraged at the outlook for 1885, and reports from all quarters show that the winter has thus far not been a severe one to the cattle interests of the Territory. The recent heavy snow did not extended to the ranges generally, and out west, in the Raft River country and farther north, and in the extreme south, the fall thus far has been very light.

The whole Territory seems to be wak ing up to the importance of the new in-terest, and organizations are springing into existence in the obscurest towns. It is a significant fact that in a small burg like Woodruft, eighty names of active members? ere enrolled in the

active members ree enrolled in the organization.

The coming cattle, horse and sheep growers' convention, called for April. in this city, will be the most notable convention of the new interest which ever assembled in Utah, and one that will probably give a further push to the rising boom. The committee appointed by the City Council to consider the petition for an appropriation to assist in defraying the expenses of the occasion, we learn, has decided that the city has no authority to make such an appropriation, but to encourage the good work, the committee will recommend that the City Hall chamber, lighted, heated, etc., be furnished for the convention free of cost, this with some other features, will practically amount to an appropriation.

To the Horse and Cattle Breeders of Utah,

To the Horse and Cattle Breeders of Utah, and adjoining Territories and States:
Realizing the necessity of co-operation in the protection of our stock interests. We invite the stock men throughout this interior region to unite in forming a convention, to be held April 2d, at Salt Lake City. We invite the co-operation of all who feel an interest in the movement, and suggest that the different associations and individual members thereof, express their views upon the thereof, express their views upon the subject.
The following subjects will be con-

OUR DEMOSTHENES.

The First Knockdown Against the Two Brilliant Conceptions of Governor Murray Contrasted.

> We have always contended that Governor Eli H. Murray was without a peer in the field of oratory; he has but to rise to his feet in a public meeting, and high thoughts, elegant conceptions, noble figures, clothed in original langnage, well up from his heart to his lips with a spontaneity that carries all be-fore it. Nothing better illustrative or the lack of preparation, evident in the Governor's efforts of their utter extem-poraneousness and originality, could be produced than the two following ex-

lofty purpose in view—the third circle.

That gallery, the one below it, the first thus far. That gallery, the one below it, the first circle and indeed the whole house were crowded last night to witness Byron in his perennial portraiture of Joe Ferris, the Ferret. There is no youngster in the city who does not know the story of Across the Continent off by heart, and yet the youngster element roosted in the circles last night and stormed and howled with the same enthusiasm as if the wonderful achievements of Ferris and knock-me-down Johnnie were a fresh told tale. It would be idle to criticise the play. It is clap-trap, blood and thunder, dime novel, burlesque, song and dance, and trashy to the last degree—and the gallery element—and last night there was a good deal of it down stairs—luxuriated and revoled. Acroes the Continent was written to make money; it achieves that end and with that observation it may be dismissed. The neople played their thank less parts with evenness and care, and again demonstrated the all around ability the company possesses; yet all are seen to better advantage in the drama, Rags and Bones—a play which has some genuine merit as a composition, which can not be said of last night's bill.
